

With the launch of the latest model, Paul & Rodriguez ranks among those who have at least 9 signature shoes, the real legend of Nike athletes. In the Paul & Rodriguez Signature Series, the latest signature shoe has the most cutting-edge technology, it will be a low-key and passionate style of Paul and he is a forward-looking thinking mode of the movement of the slide into one. Hexagonal zoom air cushion unit is arranged on the front foot, for this low help skateboard shoes provides excellent flexibility, its design is to let you put aside concerns, without any thought of the tibia hurts. Add on foot wrapped Nike Flywire fly line technology can lock the feet, and soft suede uppers can better promote the flip skateboards, allow you to eventually make really suitable for their own actions.

[Chinese shoes Network - Domestic News Shenzhou VIII was successfully launched on November 1, China's aerospace industry the world's attention, a lot of companies have expressed support in various forms, the well-known Olympic sports brand from 2005 onwards and Space "bonds" China Space Foundation was awarded "China's space industry partners." China Aerospace lasting bonds with 7 years precisely Pick off seven years, substantial growth in corporate sales. Olympic chairman Xu Jing Nan said, "This is thanks to the constant pursuit of the Olympic core technology and innovation, and adhere to technological innovation, it is the essence of the spirit of China's space where."

Pick the core basketball shoes CUSHION-3 three cushioning technology, inspiration is derived from rocket-propelled works. Newton said very popular: If you take certain speed throws back a certain quality, you'll receive a reaction driven forward acceleration. Pick CUSHION-3 three cushioning technology has obtained national patent. Using three different materials, by absorption, dispersion and bounce to form a perfect cushioning system that allows the foot bounced - start to accelerate - to move forward, go. The first time landing to absorb all the shocks, all the energy can be distributed to all parts of the cushioning system, improved cushioning, stability shoes, while the energy inherent in the next step starts rebounded into force, so that every The floor becomes more powerful forward. Currently, CUSHION-3 three cushioning technology through continuous upgrading, already widely used in NBA player Shane Battier, Mackey, Landry et al in the exclusive boots. Peak CEO Xu Zhihua said that next year will continue to increase R & D investment in the Olympic efforts, learn astronauts spirit of innovation, to provide consumers with products more fit.
